STAIN AND PAINT COLORS FOR COMMERCIAL DOORS

BENEFITS OF PREFINISHED WOOD DOORS FROM CLEARY WHOLESALE

- Eliminates factory lead time for small prefinished jobs
- More economical than field finishing
- Doors are properly sanded before finishing
- Acrylic Urethane waterbase sealer and top coat
- Doors are IR cured with water based acrylic technology
- Doors are stretch wrapped for shipping
- Doors can be kept off the site longer, avoiding job site damage
- Custom color matches and other door manufacturers' standard color matches available. Contact sales for information.

11 INTERIOR & EXTERIOR PRODUCTS

(INCLUDING FIBERGLASS DOORS)

STAINS SHOWN IN THIS BROCHURE ARE MANUFACTURER'S EQUIVALENT COLORS. DUE TO DIFFERENT APPLICATION PROCESSES AND VARIATIONS IN WOOD VENEERS, NO EXACT MATCH IS REPRESENTED.

Since wood is a natural material, it will vary from tree to tree, or even within the same tree, resulting in actual grain or color appearance which may be different from the samples shown. Cleary Wholesale cannot guarantee that actual product color or grain will duplicate any of these or other furnished samples.

Various species, particularly natural birch, contain both heartwood and sapwood in varying degrees per WDMA and HPVA standards. Cleary Wholesale is not responsible for these variations.

Barber pole occurs in most species of veneers when book matched and is not evident in sample size veneer cuts. Cleary Wholesale cannot honor claims for barber pole dissatisfaction. Special ordering slip matched veneers will minimize this problem.

Wood is a natural material with character, color and grain patterns that can vary even with the same tree. No set of samples will cover the possible range of color and grain variability, particularly red oak.

Samples supplied by Cleary Wholesale are not intended to, nor will they serve to conclusively illustrate the color and grain variation of a species.
